CLASSIFIED INDEX VOLS. 1—25

This 25-volume cumulative index is based upon the Physics and Astronomy Classification Scheme (PACS) developed by the American Institute of Physics. Each paper is listed under its appropriate heading, with multiple entries indicated by cross references following the bibliographic data. The author index shows only the major code number; for additional listings see the individual cross references.
An asterisk preceding an entry denotes a review and/or tutorial paper.

00 GENERAL

01 Education, history, and philosophy

* **Sargent, M. III:** Mode Locking in Quantum Optics. **1,** 133 (1973)
06, 42.55

02 Mathematical methods in physics

Burgelman, M.: A Model for the Off-On Transition in Thin ZnTe Films. **21,** 249 (1980)
73, 65

Dose, V.; Fabricius, K.; Müller, E.; Scheidt, H.: Signal Broadening in Potential Modulation Differentiation. **19,** 119 (1979)

Franceschetti, G.; Papas, C. H.: Mechanical Forces and Torques Associated with Electromagnetic Waves. **23,** 153 (1980)
41

Jaggard, D. L.: An Application of Isoperimetric Inequalities to the Transmission of Scalar Waves Through Small Apertures. **18,** 149 (1979)
41

Jaggard, D. L.: Stability of Higher-Order Bragg Interactions in Active Periodic Media. **13,** 185 (1977)
42.82, 41

Jaggard, D. L.; Mickelson, A. R.: The Reflection of Electromagnetic Waves from Almost Periodic Structures. **19,** 405 (1979)
41, 42.82

Jaggard, D. L.; Mickelson, A. R.; Papas, C. H.: On Electrimagnetic Waves in Chiral Media. **18,** 211 (1979)
41

Jaggard, D. L.; Papas, C. H.: On the Application of Symmetrization to the Transmission of Electromagnetic Waves Through Small Convex Apertures of Arbitrary Shape. **15,** 21 (1978)
41

Johnson, K. C.: Coupled Scalar Wave Diffraction Theory. **24,** 249 (1981)
41, 42.10

Johnson, K. C.: General Coupled-Wave Diffraction Theory. **25,** 169 (1981)
41, 42.10

Johnson, W. A.; Dudley, D. G.: The Green's Function Moment Method. **16,** 79 (1978)
41

Langenberg, K. J.: Pulse Propagation Over Smooth Irregular Terrain. **15,** 31 (1978)
84

* **Langenberg, K. J.:** Transient Fields of Linear Antenna Arrays. **20,** 101 (1979)
84

Masheva, V. G.; Kotzev, J. N.; Apostolov, A. V.: Magnetic Texture Analysis of Polycrystalline Ferromagnetic Materials. General Theory. **23,** 93 (1980)
75.30, 614

Meinköhn, D.: A Response Function Characterization of the Thermal State of Plastic Samples in Dynamic Testing. **17,** 377 (1978)
460

Peng, S. T.: Rigorous Analogies between Elastic and Electromagnetic Systems. **1,** 87 (1973)
43, 84

Schieber, D.: Some Remarks on the Classical Electrodynamics of Moving Media. **14,** 327 (1977)
41

* **Schulz-DuBois, E. O.; Rehberg, I.:** Structure Function in Lieu of Correlation Function. **24,** 323 (1981)
06

Schulz-DuBois, E. O.; Koppe, H.; Brummer, R.: Signal Statistics of Laser Light Scattering. **21,** 369 (1980)
05, 42.80

Tango, W. J.: The Circle Polynomials of Zernike and Their Application in Optics. **13,** 327 (1977)
42.30

Tao, S. J.: Parameters Used for Doppler Broadening Spectra of Positron Annihilationγ-Rays. **16,** 409 (1978)
29, 71

Thakur, K. P.: Equation of State for Solids Under High Pressure, with Application to Alkali Halides. **16,** 201 (1978)
64, 81

Vincent, P.: Singularity Expansions for Cylinders of Finite Conductivity. **17,** 239 (1978)
41, 42.10

Vincent, P.: Symmetry Group and Natural Resonances for a Cylinder of Finite Conductivity. **18,** 291 (1979)
42.10, 41

05 Statistical physics and thermodynamics

* **Baltes, H. P.:** Coherence and the Radiation Laws. **12,** 221 (1977)
42.10

Baltes, H. P.: Deviations from the Stefan Boltzmann Law at Low Temperatures. **1,** 39 (1973)
07

Baltes, H. P.; Hilf, E. R.; Pabst, M.: The Long-Time Behaviour of the Electric-Field Autocorrelation Function in a Finite Photon Gas. **3,** 21 (1974)

Baltes, H. P.; Pabst, M.; Hilf, E. R.: The Long-Time Behaviour of the Electric-Field Autocorrelation Function in a Finite Photon Gas (Erratum). **5,** 83 (1974/75)

Di Vita, P.; Vannucci, R.: The "Radiance Law" in Radiation Transfer Processes. **7,** 249 (1975)
42.82

Gerhardt, H.; Welling, H.; Frölich, D.: Ideal Laser Amplifier as a Phase Measuring System of a Microscopic Radiation Field. **2,** 91 (1973)
42.55

Gnutzmann, U.; Clausecker, K.: Theory of Direct Optical Transitions in an Optical Indirect Semiconductor with a Superlattice Structure. **3,** 9 (1974)
78

Goodman, J. W.: Statistical Properties of Mutual Intensity with Finite Measurement Time. **2,** 95 (1973)
42.30

Grossmann, S.; Kümmel, H.; Richter, P. H.: Intensities and Correlations in Two-Mode Lasers near Threshold. **1,** 257 (1973)
42.55

Mishina, H.; Asakura, T.: Measurement of Velocity Fluctuations in Laser Doppler Microscope by the New System Employing the Time-to-Pulse Height Converter. **5,** 351 (1974/75)
07
